1.0 PERMIT ASSIGNMENT

- 1.1 Qualifications** All of the following conditions must be met in order to qualify for assignment to this General Air Contaminant Discharge Permit (ACDP):
- a. The permittee is performing seed cleaning operations as described on the cover page of this permit, including supporting activities.
 - b. A Simple or Standard ACDP is not required for the source.
 - c. The source is not having ongoing, recurring or serious compliance problems.
- 1.2 Assignment** DEQ will assign qualifying permittees to this permit that have and maintain a good record of compliance with DEQ's Air Quality regulations and that DEQ determines would be appropriately regulated by a General ACDP. DEQ may rescind assignment if the permittee no longer meets the requirements of OAR 340-216-0060 and the conditions of this permit.
- 1.3 Permitted Activities** The permittee is allowed to discharge air contaminants from processes and activities related to the air contaminant source(s) listed on the first page of this permit until this permit expires, is modified, revoked or rescinded as long as conditions of this permit are complied with. If there are other emissions activities occurring at the site besides those listed on the cover page of this permit, the permittee may be required to obtain a Simple or Standard ACDP or General ACDP Attachment(s), if applicable.
- 1.4 Relation to Local Land Use Laws** This permit is not valid in Lane County, or at any location where the operation of the permittee's processes, activities, and insignificant activities would be in violation of any local land use or zoning laws. For operation in Lane County, contact Lane Regional Air Protection Agency for any necessary permits at (541) 736-1056. It is the permittee's sole responsibility to obtain local land use approvals as, or where, applicable before operating this facility at any location.

2.0 GENERAL EMISSION STANDARDS AND LIMITS

- 2.1 Visible Emissions** The permittee must comply with the following visible emission limits, as applicable:
- a. Emissions from any air contaminant source must not equal or exceed 20% opacity for a period aggregating more than

3 minutes in any one hour.

- b. In Clackamas, Columbia, Multnomah, or Washington Counties, emissions from any air contaminant source other than fuel burning equipment must not equal or exceed 20% opacity for a period aggregating more than 30 seconds in any one hour.

2.2 Particulate Matter Emissions Particulate matter emissions from any air contaminant source, other than fugitive emission sources, must not exceed 0.1 grain per dry standard cubic foot.

2.3 Fugitive Emissions The permittee must take reasonable precautions at all times to prevent particulate matter from becoming airborne, such as but not limited to:

- a. Treating vehicular traffic areas of the plant site under the control of the permittee, including parking lots and work yards;
- b. Operating all air contaminant generating processes so that fugitive type dust associated with the operation will be adequately controlled at all times; and
- c. Storing process materials, product or materials collected from air pollution control equipment in a covered container or other method equally effective in preventing the material from becoming airborne during storage and transfer.

2.4 Particulate Matter Fallout The permittee must not cause or permit the emission of any particulate matter larger than 250 microns in size at sufficient duration or quantity, as to create an observable deposition upon the real property of another person. DEQ will verify that the deposition exists and will notify the permittee that the deposition must be controlled.

2.5 Nuisance and Odors The permittee must not cause or allow the emission of odorous or other emissions so as to create nuisance conditions off the permittee's property. Nuisance conditions will be verified by DEQ personnel. The creation of nuisance conditions may, in addition to other action DEQ may take, result in rescinding assignment to the permit and the permittee will be required to obtain a Simple or Standard ACDP, whichever is applicable.

3.0 OPERATION AND MAINTENANCE REQUIREMENTS

3.1 Work practices Notwithstanding Condition 3.2, the permittee must perform an inspection of the facility at least once each month to ensure that

reasonable precautions are being taken to minimize fugitive emissions and that all pollution control equipment are working properly.

3.2 Fugitive Emissions Control Plan While operating in the Medford-Ashland AQMA, the permittee must prepare and implement site-specific plans for the control of fugitive emissions in accordance with OAR 340-240-0180. While operating in the Lakeview Urban Growth Area (UGA), the permittee must prepare and implement site-specific plans for the control of fugitive emissions in accordance with OAR 340-240-0410.

3.3 O&M plan While operating in the Medford-Ashland AQMA, the permittee must prepare and implement an operation and maintenance (O&M) plan in accordance with OAR 340-240-0190. While operating in the Lakeview UGA, the permittee must prepare and implement an O&M plan in accordance with OAR 340-240-0420. Once implemented, permittee must operate in compliance with the plan.

4.0 PLANT SITE EMISSION LIMITS

4.1 Plant Site Emission Limits (PSEL) The permittee must not allow plant site emissions to exceed the following:

Pollutant	Limit	Units
PM	24	tons per year
PM ₁₀	14	tons per year

4.2 PM₁₀ PSEL for Medford-Ashland AQMA For sources operating in the Medford-Ashland AQMA, the permittee must not allow plant site emissions of PM₁₀ to exceed the following:

Pollutant	Limit	Units
PM ₁₀	4.5	tons per year
	49	pounds per day

4.3 Annual Period The annual plant site emissions limits apply to any 12-consecutive calendar month period.

5.0 COMPLIANCE DEMONSTRATION

5.1 Monitoring Requirements The permittee must monitor the operation and maintenance of the plant and associated air contaminant control devices as follows:

- a. Maintain monthly production records for each type of equipment or activity listed in Attachment 1; and
 - b. Perform a plant inspection at least once a month.
- 5.2 PSEL Compliance Monitoring** Compliance with the PSEL is determined for each 12-consecutive calendar month period based on the following calculation for each pollutant: [Note: calculations are not required unless requested by DEQ]
- $$E = \frac{\sum(EF \times P)}{2000}$$
- where
- E = pollutant emissions (ton/yr);
 - EF = pollutant emission factor (see Attachment 1);
 - P = material throughput (tons)
- 5.3 Emission Factors** The permittee must use the default emission factors provided in Attachment 1 for calculating pollutant emissions, unless alternative emission factors are approved by DEQ. The permittee may request or DEQ may require using alternative emission factors provided they are based on actual test data or other documentation (e.g., AP-42 compilation of emission factors) that has been reviewed and approved by DEQ.

6.0 RECORDKEEPING REQUIREMENTS

- 6.1 Monitoring Requirements** The permittee must monitor and maintain the following records related to the operation and maintenance of the plant and associated air contaminant control devices:
- a. Amount of seed processed on a monthly basis for each type of equipment or activity listed in Attachment 1; and
