Form Instructions

MF800 SERIES

Form Series MF800 contains miscellaneous forms necessary for the Permit application, as described below.

- Form MF801, Completeness Determination Checklist, serves as a checklist for the owner/operator in preparing the application and for DEQ in reviewing the application.
- Land Use Compatibility Requirement for Environmental Permits/Approvals is required of all new facilities and for any owner/operator that identifies and/or requests in the Permit application *any* increase in emissions due to a plant expansion.

This form helps determine whether the Permit application is complete. It also helps DEQ in its review of the Permit application for completeness. DEQ has 60 days from the date the application is received to determine if the application is complete so processing of the Permit can begin.

Complete this form *once* for the facility.

Under each section (Identifying Information, Emissions Information, etc.), in the space provided, enter the page numbers of the Permit application in which the information identified is provided.
