Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

Readiness summary (to be completed by reviewer after checklist is completed): Permittee submitted WPCF permit application on 5-2-2006, verify with permit writer on status of both applications before proceeding with RR; as of 8-28-17 review can be completed based on available NPDES permit file, WPCF application is still outstanding and will not be considered for this review;

See ammendment #5 for stipulation and final order (SFO) #WQ-CR-90-112 for information on existing permit limits for BOD (dry and wet), and TSS. It is unclear from the permit file if the SFO was ever terminated. The SFO in the permit file does not have any dates or signatures; Permit expired in 1995, it will need to be re-written according to new permit templates; Application is drastically insufficient, it is an out of date form R. Form 2A is not included. There is not any data available for the permit writer. A new application will likely be needed; Length of permit expiration, existing limits and SFO indicate that the facility may need to upgrade treatment capabilities that may require a compliance schedule;
