Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

Readiness summary (to be completed by reviewer after checklist is completed): sept 1999 permit modified to accept wastewater from the Gould superfund site (unsure if this is still a active process); 2007 a report was submitted that showed water quality for onsite water treatment from planned iterim remedial measures for a nearby site; permit is for a cleanup site, it was determined that there are not any industrial activities taking place according to facility description; need to verify compliance schedule compliance; investigation required for TMDL;							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						150
