Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

Readiness summary (to be completed by reviewer after checklist is completed): facility treats contaminated groundwater and discharges through local conveyance system to Willamette river; some compliance issues with oil and grease; Mixing zone study was not reviewed, study should be re-evaluated to ensure appropriate application and additionally for applicability; special conditions require an arsenic quantification plan with monitoring requirements, evaluate continuation of plan; there are not any current WET requirements; TMDL needs to be investigated;							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						106
