Readiness summary (to be completed by reviewer after checklist is completed): This permit is delayed until EPA drafts a general permit for all dams on the Columbia River. This is the result of a lawsuit. This permit will be terminated in favor of the state version of the Columbia River Dam general permit. The permittee submitted application materials June of 2012 and June 2014 before and after the lawsuit was settled. Any TMDLs for the Columbia River need to be evaluated to determine any requirements. There may be a 401 permit with FERC required. Also consultation with EPA required. Newer data from the facility may be required.							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						62
