Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

<p>Readiness summary (to be completed by reviewer after checklist is completed): in 2008 the fujimi corporation terminated their industrial pretreatment permit and applied for an NPDES permit; additional issues may arise due to the interpretations of "waters of the state", Fujimi discharges from a drainage ditch into Tapman Creek+ tributary that eventually discharges into Coffee Creek (which is listed as receiving water body), it is unclear in a cursory review what flows are used in the mixing zone study; LUCS on file (see NWR shared); WET testing may be required, this should be evaluated by the permit writer; coffee creek is listed for temperature; initial application was incomplete, missing information was requested on March 16, 2017 and received in April; mixing zone issues may result in permit changes that will required a compliance schedule;</p>							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						75
