Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

<p>Readiness summary (to be completed by reviewer after checklist is completed): The Oregon Resources Corporation maintains a former nickel ore processing facility that's been inactive since 1998. The permit is only for treated stormwater discharge. The WET test requirement was removed. This decision needs to be reviewed given the potential toxicity of the discharge. This facility has several violations in the past that are already addressed. A careful review of the data will be needed when the permit is renewed.</p>							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						116
