Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

<p>Readiness summary (to be completed by reviewer after checklist is completed): The permit is owned by IP, but is used by the Gardiner Sanitary District for municipal discharge to the pacific ocean. The permit writer needs to determine if a MZ is needed. The facility may need WET testing because of the industrial leachate still in the system. Enterococcus data will need to be collected from the effluent. The facility should be evaluated by an engineer to determine design flows for wet and dry average flows. A groundwater evaluation should to be completed.</p>							
<p>Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)</p>						159
