Information Required for Individual Wastewater NPDES Permit Readiness Review

Checklist to be completed by permit readiness team

Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

*Key documents required to complete this review - application, correspondence and permit

<p>Readiness summary (to be completed by reviewer after checklist is completed): new robust treatment system was installed during last permit term (membrane bio reactor) see (MAO) No. WQ/M-WR-08-094 for completion notice; Due to the installation of the new system, the permit writer will need to complete thorough evaluation of each of the impacted areas of the permit i.e. biosolids, recycled water and groundwater plans. the new system will result in a decommissioning of 3 previously used aeration lagoons that will likely add some complexity to the permitting process (review of facility plan estimated time rankings will be higher due to this); the cover page for EPA form 2A appears to be missing (does not appear to be a critical page); mixing zone study should be reviewed and/or updated (2011); WET testing is not required in the current permit;</p>							
Readiness Score ((# of "action required" + Sum of estimated time rankings) * Complexity)						100
