# Information Required for Individual Wastewater NPDES Permit Readiness Review

## Checklist to be completed by permit readiness team

### Water Quality Permitting

Use this checklist to determine Individual NPDES permit readiness. Complete one readiness review for each individual permit

\*Key documents required to complete this review - application, correspondence and permit

Indicate permit status and/or reasons for delay	administratively extended	Category for delay	Resource limitations		Reason for delay	Technical staff unavailable	

**Readiness summary (to be completed by reviewer after checklist is completed):** Facility has changed ownership a few times and has gone from a smelting process to a crushing process. ELG's have been updated; according to fact sheet, flows are minor and rare, however flows are not monitored according to schedule A or B; permit writer should investigate and verify applicability of effluent guidelines, the permit writer may need to request production data which is not included with a application; there are not any site maps or treatment schematics with the application; mixing zone study was not available for review, permit writer should review the need for mixing zone and update or request a new mixing zone study; WET testing requirements should be evaluated; There is a TMDL for Lobster creek watershed, permit writer should ensure that crawford is not included in the management plan;
