Print Form

BULK GASOLINE PLANTS **FORM AQGP-117**
ASSIGNMENT TO GENERAL AIR CONTAMINANT DISCHARGE PERMITS **ANSWER SHEET**

Source Category Description:

Bulk Gasoline Plants; gasoline storage and distribution facilities which receive gasoline from bulk terminals by pipeline, ship, barge, railroad car or trailer transport, store it in tanks, subsequently dispense it via account trucks to local farms, businesses, and gasoline dispensing facilities, and that have throughputs of less than 20,000 gallons of gasoline per day.

1. Qualifications: For each qualification statement listed below, answer "yes" or "no" in the far right column.

a. Do your facility's operations meet the description provided above?	
b. Is the maximum calculated design throughput of your facility less than 20,000 gallons of gasoline per day?	
c. Are there any other activities taking place at your facility identified in OAR 340-216-0020, Table 1?	
d. Are there any other activities taking place at your facility that cause air pollutant emissions, which are not described above?	
e. If you answered yes to question d, what are your other activities?	
f. Is your facility currently in compliance with DEQ regulations?	
g. Have there been any violations at your facility in the last 5 years?	
h. If there have been violations at your facility, have they been resolved?	
i. Does your facility have the proper land use approvals? (A Land Use Compatibility Statement (LUCS) must be attached to the application.)	

2. Plant Information:

a. Provide the date your facility began or will begin operation.

b. Are all gasoline storage tanks at your facility equipped with a submerged fill system?

"Submerged fill" means any fill pipe or hose, the discharge opening of which is entirely submerged when the liquid is 6 to 12 inches above the bottom of the tank.

c Is your facility equipped with a vapor tight vapor balance system (or Department approved equivalent system) to prevent displaced vapors from tank filling from being released to the atmosphere?

d. Identify the following parameters for each organic liquid storage tank at your facility (if your facility has more than four tanks, additional data entry fields are provided at the end of this form):

	Tank 1	**Tank 2**	**Tank 3**	**Tank 4**
Tank type: (above or underground)				
If above ground, type of roof (fixed; internal or external floating)				
Tank storage capacity (gallons)				
Tank length or height (feet)				
Tank diameter (feet)				

	Tank 1	Tank 2	Tank 3	Tank 4
Date of tank construction/installation				
Pressure release setting of pressure release valve (psi)				
Name of product stored in tank				
True vapor pressure of stored product @ 60°F (psi)				
Normal 12-month throughput for product (gallons)				
Projected maximum 12-month throughput (over the next 5 years) (gallons)				
Discharge opening of fill pipe: distance from the bottom of the tank (inches)				

e. Identify your maximum projected annual gasoline throughput (gallons/yr). ☐

f. Does your facility have a daily average gasoline throughput of 4000 gallons/day based upon a 30-day rolling average? ☐

g. Do all tank trucks utilize a submerged fill system when receiving gasoline at your facility? ☐

3. Permit Requirements:

All conditions of the General ACDP apply to the source, unless they are listed below. The applicability of these permit conditions depends on the location of the facility, the kind of equipment the facility has and the date it was installed. For each permit condition listed below, indicate whether the condition applies to your facility by answering the question.

Permit condition	Applicability question:	Answer (yes/no)
2.1.a	Is the facility located outside of Clackamas, Columbia, Multnomah, and Washington Counties?	
2.1.b	Is the facility located in Clackamas, Columbia, Multnomah, or Washington Counties?	
3.1	Is the facility located outside the Portland-Vancouver AQMA, Medford-Ashland AQMA, or Salem/Kaiser Area Transportation Study Area?	
3.4	Is the facility located in the Portland-Vancouver AQMA, Medford-Ashland AQMA, or Salem/Kaiser Area Transportation Study Area?	
3.5	Is the facility located in the Portland-Vancouver AQMA?	
3.6	Is the facility located in the Medford-Ashland AQMA?	
3.8, 3.10	Is the facility located in the Medford-Ashland AQMA or Lakeview UGA?	
7.6	Is this a new facility?	

4. Additional Tank Information

	Tank 5	**Tank 6**	**Tank 7**	**Tank 8**
Tank type: (above or underground)				
If above ground, type of roof (fixed; internal or external floating)				
Tank storage capacity (gallons)				
Tank length or height (feet)				
Tank diameter (feet)				
Date of tank construction/installation				
Pressure release setting of pressure release valve (psi)				
Name of product stored in tank				
True vapor pressure of stored product @ 60°F (psi)				
Normal 12-month throughput for product (gallons)				
Projected maximum 12-month throughput (within the next 5 years) (gallons)				
Discharge opening of fill pipe: distance from the bottom of the tank (inches)				
	Tank 9	**Tank 10**	**Tank 11**	**Tank 12**
Tank type: (above or underground)				
If above ground, type of roof (fixed; internal or external floating)				
Tank storage capacity (gallons)				
Tank length or height (feet)				
Tank diameter (feet)				
Date of tank construction/installation				
Pressure release setting of pressure release valve (psi)				
Name of product stored in tank				
True vapor pressure of stored product @ 60°F (psi)				
Normal 12-month throughput for product (gallons)				
Projected maximum 12-month throughput (within the next 5 years) (gallons)				
Discharge opening of fill pipe: distance from the bottom of the tank (inches)
