

Supplemental Environmental Project Annual Progress Report: Friends of Trees June 2023

Summary

The Supplemental Environmental Project (SEP) tasked to Friends of Trees under the Mutual Agreement and Final order in Case No. AQ/V-NWR-2020-208 (MAO) is well underway. After more heat records were broken this past summer and October, it's imperative to plant trees that will help mitigate the urban heat island effect and improve carbon sequestration in the project neighborhoods of Argay, Cully, Parkrose, Sumner, and Wilkes. Residents of these lower canopy neighborhoods live adjacent to industrial zones as well as the confluence of Interstate 84 and Interstate 205.

Since the SEP was approved in March 2022, Friends of Trees and various community partners have brought together over 1,000 community members to plant nearly 4,500 trees and native plants across five neighborhoods in NE Portland. This report outlines the activities undertaken thus far, as well as the outcomes and future plans to

complete the project approved in Exhibit A to the MAO.

Community Engagement & Project Outreach

Clean Air Canopy Coalition

To support our outreach and community engagement efforts to complete the SEP, FOT formed a coalition of various community groups and organizations based in the project area. Named the Clean Air Canopy Coalition, this group consisted of the following groups:

- Verde
- Cully Air Action Team (CAAT)
- Cully Association of Neighbors (CAN)
- Columbia Slough Watershed Council (CSWC)

The primary goal of this coalition is to help spread general awareness of the project, recruit volunteers, help us form connections with community groups and leaders, engage community members in conversations about trees and their benefits, and to help identify locations to plant trees. The coalition met bi-monthly throughout Summer 2022 to develop an outreach plan and stay

apprised of the group’s activities. Over the course of the past year, this coalition has partnered on a number of engagement activities, ranging from tree walks to outreach events to door-to-door canvassing efforts.

The coalition collaborated on multiple outreach efforts, the most notable being culturally specific community tree walks organized by Verde.

Habitat for Humanity Homeowners & Arbor Mobile Home Park Residents (8/30/22)

The first was a collaboration with Habitat for Humanity, Verde, and Friends of Trees. This tree walk was held on a particularly warm day, so it did not include a tree walk in itself but did include a teaching opportunity where you can remember and learn about the trees in their neighborhood and the importance of trees. Additionally, community members were able to engage in conversations about the clean air canopy, SEP projects, and the importance of increasing the tree canopy.

Afro ecology walking series with Living Cully & Portland Fruit Tree Project (9/17/22)

The second tree walk was part of an established Afro-Ecology Series in the city and highlighted trees in an area of town historically home to black and brown community members. Friends Of Trees took a supportive role on this day, and Mini committee members were engaged in the importance of trees, impact on the community, and how to engage with getting trees for their own community.

Lideres Verdes group, Andando en Bicicletas en Cully & Latinx community (9/29/22)

The third in the tree walk series was with Lideres Verdes, *Andando en Bicicletas*, as well as Friends Of Trees. This event was entirely in Spanish and included a walk around the neighborhood. This walk was designed and put together by longtime Friends Of Trees volunteer, urban forestry commissioner, and retired Forrester. The walk itself was translated by Friends Of Trees staff, errs and included, not only conversations about local trees, but trees from the cultures and countries from which the residence came.

Tree Planting Outreach

In addition to general community engagement, FOT staff also employed a number of additional tactics to solicit tree planting locations and recruit volunteers. This included hanging posters in prominent community locations, sending targeted mailings to the residents that live within the project area, and targeted outreach to past tree-recipients and volunteers.

All Outreach activities are outlined in the table below. Outreach materials available in Appendix C.

FOT 2022 - 2023 Outreach Activities			
Event	Date	Partners Involved	Outcomes
Outreach tabling: Sunday Parkways: Cully	6/26/22	FOT, CAAT, CAN, Verde	Many community members engaged in conversation
Outreach tabling: Festival de Fronterizas: Cully	7/2/22	FOT	45 community members engaged in conversation
Outreach tabling: Sunday Parkways: E Portland	8/21/22	FOT	19 community members engaged in conversation

FOT 2022 - 2023 Outreach Activities (continued)

Event	Date	Partners Involved	Outcomes
Outreach tabling: Khunamokwst Park Music in the Park	8/25/22	Verde, FOT, CAN	Many community members engaged in conversation
Tree Walk: Habitat homeowners & Arbor mobile home park residents	8/30/22	Verde & FOT	30 participants Attendees discussed trees, their benefits, and where there is a need for trees in their community.
Tree Walk: Afro ecology walking series with Living Cully & Portland Fruit Tree Project	9/17/22	Verde & FOT	20 participants Attendees learned about local trees, their benefits, and where there is a need for trees in their community.
Tree Walk: Lideres Verdes group, Andando en Bicicletas en Cully & Latinx community	9/29/22	Verde & FOT	30 participants Session led fully in Spanish, attendees discussed trees, this project, and where they see a need for trees in their community.
Canvassing: Commercial Property Outreach	8/22 to 12/22	CAAT & CSWC	Multiple industrial properties throughout the slough corridor were approached to plant trees on their property
Mailings: Postcard mailings to community members and prospective tree-recipients	8/22 to 3/23	FOT	Mailed postcards to 5,000 property owners *See appendix A.
Customer Support: Phone calls and email exchanges with tree recipients	9/22 to present	FOT	Customer support for tree recipients via email and phone
Canvassing: Door-to-door follow ups with tree-recipients	11/22 to 4/23	FOT	250 properties approached to discuss tree planting options available and support with tree ordering
Outreach Tabling: Greening Wilkes Earth Day Celebration	4/22/23	FOT, Verde, CSWC, Portland Audubon	Wilkes community event celebrating greening efforts in the community, over 200 community members engaged

Planting & Event Overview

Over the course of the 2022-2023 planting season, Friends of Trees hosted 13 public volunteer planting and stewardship events, in addition to 4 educational plantings with youth throughout the target project area. Our volunteers and community stakeholders planted 4,666 trees and native plants at over 160 properties. General event details are outlined in the table below. Further planting details are outlined in Appendix C.

Neighborhood Planting Events - Tree Planting

FOT's neighborhood plantings are premised on engaging nearby community members to foster a sense of community through planting trees together. By planting trees in rights-of-way and on private properties, both residential and commercial, neighborhood planting events advance local urban forestry goals to increase urban canopy, inspire greater awareness of the benefits of trees, foster place-making, and strengthen community connections through shared experiences.

After the initial community building and place making opportunities, FOT's Neighborhood Trees Program (NT) hosted 6 different neighborhood tree planting events throughout the planting season (October 2022-April 2023) in the SEP project area. Each planting focused on one or two neighborhoods and delivered programming, supporting the community itself.

Cully Neighborhood Planting

The first was in the Cully neighborhood and included collaboration from community members, Cully Clean Air Action Team, Cully Association of Neighbors, as well as residents and volunteers from Cully and beyond. There was great community buy-in! There were first time tree recipients as well as folks who had received trees in the past and folks who have been on FOT's waiting list.

Argay & Wilkes Neighborhood Planting & Level Beer

The second took place in the Argay & Wilkes (both smaller neighborhoods) target area and included a planting at a Level Beer Brewery. This was a collaborative effort between Green Space and Neighborhood Trees, and was an opportunity for committee members and the business itself to engage in tree and small shrub planting, and care. POIC also attended this group planting, focusing on the Level Beer site. Many committee members enjoyed the cross-sectional opportunity of this planting. In addition to planting the trees at Level Beer, the surrounding neighborhoods had a tree planting and residence received right away and front yard trees. We had a volunteer mulching crew at this event who supported tree maintenance.

Sumner & Cully Neighborhood Planting

The third planting took place in January 2023 and included residents of the Sumner neighborhood, who received yard trees. This was also an opportunity for folks from the Cully neighborhood to additionally get more trees. This planting included a Spanish only speaking crew, where Lideres Verdes were able to continue their learning to be Crew Leaders for future plantings.

Parkrose, Argay, Wilkes Neighborhood Planting

The fourth planting took place in Parkrose and included partner programs, such as the Lideres Verdes (who were a fully spanish-speaking crew), Blueprint Foundation, and POIC. This was a unique event in that neighborhood trees were planted in yards, but also did a separate 40 tree planting along the Columbia slough for a local business.

Spanish Planting: Planta conmigo con el corazón

The fifth planting was an entirely Spanish event, where Lideres Verdes were crew leaders of small crews of planters.. This was an amazing opportunity to continue the crew leading training program in which partners from Verde were able to become trained in how to use their skills as they themselves became the leaders. The smaller planting was an amazing opportunity for leadership development, and included street trees that permitting had been secured early on from early on applications in the season.

Cully, Argay, Wilkes, Sumner & Parkrose Neighborhood Planting

The final planting of the season was a celebration and collaboration of all of the different planting areas. Fruit and large stock trees were planted at this planting, and there was an amazing community turnout. Additionally, we had support from a local arborist, who helped us mulch as a special mulch crew. This final celebration event also included multiple Friends of Trees staff, and Friends of Trees alumnus.

Additional plantings included collaborative plantings at Helensview School. The first planting was with Portland State University Capstone Students. These students received an in-person overview of the project, and then came as a class to support Helensview High students on the planting day. The second two events were with the Helensview students and FOT staff and included both large and small trees.

Natural Area Planting Events - Small Stock Native Planting

Friends of Trees' natural area programming is focused on working with community volunteers to restore urban greenspaces through planting native trees and shrubs and performing stewardship activities. Most of these projects are located next to streams and are driven by watershed health directives; however, others are undertaken to increase urban canopy in urban green spaces and create more shade and/or wildlife habitat, or along roadways to help filter out air pollutants and reduce stormwater runoff. In all cases, FOT's natural area work facilitates the restoration of appropriate plant communities to improve local ecosystems for the benefit of people and the environment.

Through this SEP project, FOT's Green Space Program (GS) hosted five public planting events and two public stewardship events as well as co-hosted one public planting event and two school planting events with FOT's Neighborhood Tree Program.

These plantings happened across six project sites throughout outlined project area:

Gateway Green

A 25 acre natural area nestled between I-205 and I-84, Gateway Green is just east of Rocky Butte at the previous location of the Rocky Butte Jail. There are a number of trails for off-road cycling, walking, and trail running, as well as built features for honing cycling skills.

Johnson Lake Property

Located just northwest of the I-205 & I-84 interchange, Johnson Lake is bordered on the north side by a natural area owned by Portland Parks & Rec. FOT planted hundreds of native shrubs and trees throughout the Park property, as well as along the adjacent slough corridor at privately owned ACME storage facility.

Columbia Slough Natural Area

Located just south of Airport Way in the Parkrose neighborhood, this natural area comprises ~1 acre along the confluence of multiple slough channels.

Wilkes Creek Headwaters

Located in outer East Portland, Wilkes Creek Headwaters contains the springs that feed the only free flowing stream in the City of Portland that flows into the Columbia Slough, making this one of the most ecologically significant sites in the Columbia Slough Watershed. Planting at this site will reduce pollutants and erosion in the watershed, increase water quality and quantity by shading and filtering water, and improve hydrologic function by increasing water flow.

Level Beer

Located at the interface of industry and natural space along NE 148th and Airport Way, this commercial property borders the slough. FOT planted large stock trees alongside hundreds of native plants, which will help to create critical habitat and food sources for animals that live in/around the slough corridor, as well as filter harmful pollutants from entering the watershed.

Helensview School

FOT planted hundreds of native shrubs and large stock trees alongside Helensview students throughout their school property. These plantings will provide many health and ecological benefits, but more importantly, students had the opportunity to learn about the benefits of trees and gained valuable experience stewarding their shared space.

FOT 2022-2023 Planting Summary				
Public Events	Date	Tree Qty.	Native Plant Qty.	Other Notable Outcomes
Cully Neighborhood Planting	11/5/2022	99		7 yards of mulch distributed
Johnson Lake Property & ACME Storage Natural Area Planting	12/3/2022	45	694	4 yards of invasive ivy removed
Argay& Wilkes Neighborhood Planting & Level Beer Shrub Planting	12/10/22	78	459	6 yards of mulch distributed

FOT 2022-2023 Planting Summary (continued)

Public Events	Date	Tree Qty.	Native Plant Qty.	Other Notable Outcomes
Columbia Slough Natural Area Planting	1/14/23		800	14 yards of mulch & 3 yards of trash removed
Sumner & Cully Neighborhood Planting	1/21/23	77		6 yards of mulch distributed
Gateway Green Natural Area Planting	1/28/23	50	300	
Parkrose, Argay, Wilkes Neighborhood Planting	2/4/23	94		7 yards of mulch distributed
Wilkes Creek Headwaters Planting	2/11/23		1225	
Spanish Planting: "Planta conmigo con el corazón"	2/18/23	34		2 yards of mulch distributed
Gateway Green Natural Area Planting	4/1/23	50	400	9 yards of mulch distributed
Columbia Slough Natural Area Stewardship Event				15 yards of mulch distributed
Cully, Argay, Wilkes, Sumner & Parkrose Neighborhood Planting	4/15/23	84		6 yards of mulch distributed
Wilkes Creek Headwaters Stewardship Event				18 yards of mulch distributed & 2 yards of invasives removed
Youth & School Planting	Date	Tree Qty.	Shrub & Herbaceous Plant Qty.	Other Notable Outcomes
Helensview School	2/15/2023	12	100	
Helensview School	4/3/2023	6		
Helensview School	4/5/2023		59	
Totals		629	4037	90 yards mulch 9 yards invasive/ trash removed

Volunteers Overview

Volunteers are what make our work possible. Over the course of the past year, FOT engaged 1,011 volunteers for a total of 3,627.7 hours within the scope of this SEP project. Volunteer details can be found in the tables below, including an explanation of paid volunteer cohorts organized through partner organizations.

Paid Volunteer Partners

Portland Opportunities Industrialization Center (POIC)

FOT partners with POIC (an alternative high school serving opportunity youth in the Portland Metro area) to offer paid leadership and green workforce development opportunities to POIC students. Throughout the school year, students have the opportunity to learn from partner organizations, including FOT, about ecology and urban forestry. Students undergo FOT crew leader training and attend FOT plantings as crew leaders, helping them to develop valuable leadership experience. Stipends for POIC attendance at events are funded through POIC.

Los Lideres Verdes

Los Lideres Verdes is a group of Cully community leaders recruited by Verde to support community engagement and the implementation of this project. Cohort members trained as Crew Leaders and attended four events throughout the season. Stipends for the Lideres Verdes cohort was funded through Verde's Community Engagement Scope, included in this project.

Blueprint Foundation

FOT partners with the Blueprint Foundation to provide workforce development opportunities for youth of color. The Blueprint Foundation serves youth of color by offering mentorship services with the goal of uplifting, educating, and supporting the development of black-identified youth and other communities of color. The Blueprint Foundation youth and their mentors attended one planting event this planting season. Stipends for Blueprint youth were provided through Blueprint Foundation funding sources.

Other	15

Lessons Learned & Future Plans

Lessons Learned

Throughout the planting season, we planted over 600 trees and 3000 native plants , a great fit for the first year of this project. We did have to overcome some obstacles and some learning curves, one being that the City of Portland had pre-planned to plant 300 trees in our target area. The city directed us to avoid communication with these homeowners as they were planting in their right of ways. Additionally, a new system of right of way tree permitting created opportunities for FOT staff to learn and grow. Unfortunately, the City quickly fell behind issuing requested tree permits for the SEP project. Right of way tree permits took upwards of 12 weeks to process and some never got processed by the City at all. As we look at the season ahead, we will focus on streamlining this process to make it easier for residents to get right-of-way trees and secure permits well ahead of the planting dates.

Future Plans

As of June 2023, FOT has planted 629 of the 800 tree goal and 4037 of the 4200 native plants goal set forth in the approved SEP project description throughout the Owens-Brockway project area. We plan to

utilize the 2023-2024 planting season to plant the remaining 171 trees and 163 native plants via several volunteer planting events.

Neighborhood Planting Events - Large Stock Tree Planting

FOT plans to host 2 events in the 2023-2024 planting season, as well as do 2-3 schoolyard planting events. During the summer months, our Summer Inspector Team will check on the trees twice during the season to support residents in proper tree care and watering during the integral years of establishment. Our volunteer Summer Inspectors learn about young tree health, work in their community, and share tree knowledge with their neighbors to ensure the long-term survival of young trees. Throughout the summer, resources and guidance via postcards, phone calls, and follow up visits will support the overall care and success of trees planted. Survival data will be made available on FOT's final report in 2024.

Natural Area Planting Events - Small Stock Native Planting

FOT is actively maintaining our natural area project sites throughout this summer. Our staff, alongside youth crews from Northwest Youth Corps, will visit project sites multiple times throughout the summer to perform maintenance activities, including grass cutting, invasive management, mulching, and watering. We will conduct survival monitoring at all project sites in September to assess survivability and help inform our 2023-2024 plant palette. FOT will also contract with Ash Creek Forest Management to do one additional treatment at Gateway Green before the end of August 2023. This will help our new plants establish by decreasing competition with undesirable species, as well as further prep additional plantable area for next planting season.

As of June 2023, FOT has plans to continue planting at two of our six project sites next planting season. We will host two volunteer plantings at Gateway Green and one volunteer planting at Columbia Slough Natural Area. We will continue to maintain and monitor all project sites through summer 2024. Survival data for 2023 planting locations will be made available on FOT's final report in 2024.

TREES AT WORK

for clean air
+ healthy
neighborhoods

ARBOLES TRABAJANDO

para aire limpio
+ barrios saludables

You can sign up today to receive a FREE TREE planted at home or business!

Friends of Trees, Verde and Cully Air Action Team are teaming up to plant trees with neighbors to improve air quality and neighborhood health in NE Portland.

(This project is funded for 2022-2023.)

¡Puede registrarse hoy para recibir un ÁRBOL GRATIS plantado en su hogar o negocio!

Friends of Trees, Verde y Cully Air Action Team se están uniendo para plantar árboles con los vecinos para mejorar la calidad del aire y la salud del vecindario en el noreste de Portland.

(Este proyecto está financiado para 2022-2023).
