

Cleaner Air Oregon

Cumulative Health Risk Pilot, Phase 1 Listening Session

Sept. 12, 2023, 7 to 8:30 p.m.

[Join via Zoom](#) – additional participation information below

The Cleaner Air Oregon: Community Health Risk Pilot program is an opportunity to work with a community and learn how air pollution from many sources, all together, may affect their health.

This pilot project is an opportunity to look at how air pollution from many sources, all together, may affect the health. In 2018 the Oregon legislature, in Senate Bill (SB) 1541, per [ORS 468A.339](#), granted DEQ the authority to conduct an area risk pilot study for assessing, and regulating, the cumulative health risks from the emissions of industrial air toxics. DEQ is in the first phase of this [CAO Cumulative Health Risk Pilot](#) and is seeking input from you for determining where the study should take place.

Community members are key sources of information for this pilot project therefore DEQ is hosting a listening session to receive feedback about additional consideration when choosing a pilot area beyond the requirements from the bill.

Schedule

5 min.	Welcome and introductions
10 min	Background
15 min	Pilot Study Area
55 min (or less)	Community Feedback
5 min	Next Steps
