

Notice of Construction / Notice of Approval Application Type 1 Notice and Go List of Equipment

FOR DEQ USE ONLY	
Permit Number:	Regional Office:
Application No:	Date Received :
Check Number:	Amount (\$):
Approved or application submittal date:	Staff Initials:

[Instructions for filling out this form](#)

1. Source Number:	Tax Lot #:
2. Company	3. Facility Location
Legal Name:	Name:
Ownership type:	Plant start date:
Mailing Address:	Street Address:
City, State, Zip Code:	City, County, Zip Code:
4. Number of Employees (corporate):	Number of Employees (plant site):

5. Facility Contact Person (authorized to provide additional data and information)	6. Industrial Classification Code(s)
Name:	SIC:
Title:	NAICS:
Phone number:	7. LUCS Approval (if required): <input type="checkbox"/> New facility <input type="checkbox"/> Modified facility
Fax number:	
Email address:	

8. Signature	
Based on information and belief formed after reasonable inquiry, the statements and information in this document and any attachments are true, accurate and complete.	
Name of Responsible Official (Printed or Typed)	Title of Responsible Official and phone number
Signature of Responsible Official	Date

Permittees may not use an NC application in any instance if the construction or change requires a permit modification under Cleaner Air Oregon.

Notice of Construction / Notice of Approval Application

Type 1 Notice and Go List of Equipment

9. Check the appropriate box for the type of construction:

<input type="checkbox"/>	(A) Stationary internal combustion engines having a rated capacity <60 horsepower output;	<input type="checkbox"/>	(S) Process emissions from sources which are located at private, public, or vocational education institutions, where the emissions are primarily the result of teaching and training exercises, and the institution is not engaged in the manufacture of products for commercial sale;
<input type="checkbox"/>	(B) Emergency stationary internal combustion Tier 4 certified engines having a rated capacity <670 horsepower (500 kilowatts) output;*	<input type="checkbox"/>	(T) Degreasing units which exclusively use caustics (e.g., potassium hydroxide and sodium hydroxide);
<input type="checkbox"/>	(C) Hand-held sanding equipment;	<input type="checkbox"/>	(U) Equipment used for hydraulic or hydrostatic testing with water-based hydraulic fluids;
<input type="checkbox"/>	(D) Portable vacuum blasting equipment using steel shot and vented to a fabric filter;	<input type="checkbox"/>	(V) Storage tanks, reservoirs, pumping and handling equipment, and control equipment used to exclusively vent such equipment of any size, limited to soaps, lubricants, hydraulic fluid, vegetable oil, grease, animal fat, aqueous salt solutions or other materials and processes using appropriate lids and covers where there is no generation of objectionable odor or airborne particulate matter or toxic air pollutants listed in OAR chapter 340, division 247;
<input type="checkbox"/>	(E) Shot peening operations, provided that no surface material is removed;	<input type="checkbox"/>	(W) Operation, loading and unloading storage of butane, propane, or liquefied petroleum gas with a vessel capacity less than 40,000 gallons where annual emissions are less than or equal to the de minimis levels;
<input type="checkbox"/>	(F) Replacement of equipment that is used to control processes, such as temperature, air pressure, water pressure, electrical current, flow rate, etc.;	<input type="checkbox"/>	(X) Tanks, vessels and pumping equipment, with lids or other appropriate closure for storage or dispensing of aqueous solutions of inorganic salts, bases and acids;
<input type="checkbox"/>	(G) Equipment and instrumentation used for quality control/assurance or inspection purposes;	<input type="checkbox"/>	(Y) Ultraviolet curing processes, to the extent that toxic air contaminants as defined in OAR chapter 340, division 247 are not emitted;
<input type="checkbox"/>	(H) Vacuum pumps;	<input type="checkbox"/>	(Z) Contaminant detectors, sampling devices and recorders;
<input type="checkbox"/>	(I) Equipment used for extrusion, compression molding, and injection molding of plastics, provided that the VOC content of all mold release products or lubricants is <1% by weight;	<input type="checkbox"/>	(AA) Environmental chambers and humidity chambers using only gases that are not toxic air contaminants listed in OAR chapter 340, division 247;
<input type="checkbox"/>	(J) Injection or blow-molding equipment for rubber or plastics, provided that no blowing agent other than compressed air, water, or carbon dioxide is used;	<input type="checkbox"/>	(BB) Lithographic printing equipment which uses laser printing;
<input type="checkbox"/>	(K) Presses or molds used for curing, post-curing, or forming composite products and plastic products, provided that the blowing agent contains no VOC or chlorinated compounds;	<input type="checkbox"/>	(CC) Equipment used exclusively for conveying and storage of plastic pellets that don't break down or degrade and are only used for indoor manufacturing;
<input type="checkbox"/>	(L) Equipment used exclusively for the mixing and blending of materials at ambient temperature to make water-based adhesives;	<input type="checkbox"/>	(DD) Gas cabinets using only gasses that are not regulated air pollutants;
<input type="checkbox"/>	(M) Dredging wet spoils handling and placement;	<input type="checkbox"/>	(EE) Salt baths using nonvolatile salts and not used in operations which result in air emissions;

*If a facility's permit does not include all applicable conditions for the proposed engine, a permit modification is required, and this form cannot be used.

Notice of Construction / Notice of Approval Application

Type 1 Notice and Go List of Equipment

Form AQ 104A and MD901A

Answer Sheet

<input type="checkbox"/>	(N) Graphic label and/or box labeling operations where the inks are applied by hand stamping or hand rolling;	<input type="checkbox"/>	(FF) Paper shredding and carpet and paper shearing, fabric brushing and sueding as well as associated conveying systems, baling equipment, and control equipment venting such equipment. This exemption does not include carpet and fabric recycling operations;
<input type="checkbox"/>	(O) Ultraviolet disinfection processes;	<input type="checkbox"/>	(GG) Hammermills used exclusively to process aluminum and/or tin cans, and control equipment exclusively venting such equipment;
<input type="checkbox"/>	(P) The cleaning and/or deburring of metal products where all tumblers are used without abrasive blasting;	<input type="checkbox"/>	(HH) Drop hammers or hydraulic presses for forging or metal working; or
<input type="checkbox"/>	(Q) Ozone generators and ozonation equipment;	<input type="checkbox"/>	(II) Concrete application, and installation.
<input type="checkbox"/>	(R) Emissions from the storage and application of road salt (calcium chloride or sodium chloride);		

Timing of construction:

*Note: Unless otherwise specified, the responsible official must submit the [AQ104C](#) (ACDP sources) or [R1004](#) (Title V sources) form within 30 days after completing the construction or modification. [OAR 340-210-0240(3)].

10.	Date on which contracts are signed, equipment is ordered, or the facility/entity has or will otherwise 'commit' to initiating construction activities	(mm/dd/yyyy)
11.	Anticipated date of the beginning of physical construction (i.e. breaking ground)	
12.	Anticipated date of construction completion.	

Submit completed application to the appropriate Regional Office by selecting the County where the facility is located and email a convenience copy to:

Select County:
Oregon Department of Environmental Quality
