**Re: Cascade Steel Rolling Mills, Inc.
CAO Emissions Inventory – Dust Sampling Plan**

Dear Ms. Degagné:

As part of preparing our Cleaner Air Oregon air toxics emissions inventory DEQ requested a sampling and analysis plan (SAP) for certain fugitive dust sources at our facility. Enclosed with this letter is the requested SAP. As described in the SAP the speciation of air toxics that may be emitted from the fugitive dust sources at our facility represents a unique and challenging characterization effort. As such, in development of this SAP, we proactively collected representative samples to confirm the viability of our methodology thereby minimizing the chances of delay. Our plan is to submit those analytical results with our revised emissions inventory due February 13th.

If you have questions about this submittal, please contact me at 503-434-3216 or via email at jspahr@schn.com.

Sincerely yours,

A handwritten signature in black ink that reads "Jim Spahr".

Jim Spahr
EHS Director
