Sarah Kronholm,

DEQ received the submittal of the Cleaner Air Oregon (CAO) categorically exempt TEU information and further clarifying information for the Columbia Steel Casting Company, Inc. (CSCC) facility in Portland, OR on May 27, 2022 and July 22, 2022, respectively, and has completed an initial review.

In accordance with Oregon Administrative Rule (OAR) [340-245-0030\(2\)](#), DEQ has determined that the following additional information, corrections, and updates are required by August 23, 2022, in order to approve the Emissions Inventory:

1. Please revise your Emissions Inventory to include emissions estimates for all onsite welding activities. This includes, but is not limited to, *ER70S-6 WELDING WIRE 33#*.
2. Please revise supporting welding emissions calculations as needed and provide the supporting calculations in electronic spreadsheet format for DEQ review.

DEQ is requesting that you submit additional information to complete your Emissions Inventory. If you think that any of that information is confidential, trade secret or otherwise exempt from disclosure, in whole or in part, you must comply with the requirements in OAR 340-214-0130 to identify this information. This includes clearly marking each page of the writing with a request for exemption from disclosure and stating the specific statutory provision under which you claim exemption. Emissions data is not exempt from disclosure.

DEQ remains available to discuss this information request with you and answer any questions you may have. Failure to provide additional information, corrections, or updates to DEQ by the deadlines above may result in a violation of OAR 340-245-0030(1).

If you have any questions regarding this letter please contact me directly at 503-866-8741 or [kenzie.billings@deq.oregon.gov](mailto:kenzie.billings@deq.oregon.gov), and I look forward to your continued assistance with this process.

Sincerely,

Kenzie Billings, P.E.  
Air Toxics Project Manager

26-1869 Columbia Steel Castings Company, Inc.
