Re: Cleaner Air Oregon Risk Assessment Extension Request
Columbia Steel Casting Co., Inc., Portland, Oregon

Dear Mr. Giska,

On August 22, 2022, Columbia Steel Casting Co., Inc. (CSCC) advised the Oregon Department of Environmental Quality (DEQ), customers, and vendors of our intention to wind down manufacturing activities at the site. As of the end of January 2023, all casting production activities have been completed. Below is an approximate summary of the other wind down activities:

- Molding and Arc Furnace melting – completed 10/28/2022 (Building 11)
- Molding and Induction melting – completed 11/14/2022 (Building 8)
- Cleaning Room 1 - completed 12/1/2022 (Building 11)
- Cleaning Room 2 – completed 12/29/22 (Building 2)
- Machine Shop – completed 1/24/2023 (Building 15)
- Shipping – expected completion 2/28/2023

Columbia Steel received approval of the Air Toxics Emissions Inventory, Modeling Protocol and Risk Assessment Work Plan on November 4, 2022, with the requirement to submit a Level 3 Risk Assessment by March 4, 2023. To date, we are uncertain about the future uses of the manufacturing facility and respectfully request an extension of the Level 3 Risk Assessment deadline to July 31, 2023.

If you have any questions, please contact me at (503) 286-0685, x207 or martha_c@columbiasteel.com.

Sincerely,

Martha B Cox
President/CEO
