Collins Pine Company
1600 Missouri Avenue
Lakeview, OR 97630

Mr. Hughes,

DEQ received the submittal of the Cleaner Air Oregon (CAO) Level 3 Risk Assessment (Risk Assessment) for the Collins Pine facility in Lakeview, OR on July 23, 2021. Collins Pine submitted a revised Risk Assessment on July 26, 2021, including updated and complete tables that were not included in the original submittal. DEQ has completed our final review of the revised Risk Assessment.

In accordance with OAR 340-245-0050, this letter provides written notice to you that DEQ has reviewed and approves the revised Risk Assessment submitted on July 26, 2021 with the following comment:

1. Section 5.4.1. The approved Risk Assessment Work Plan dated July 25, 2020 stated that the risk determination ratio (RDR) calculations would be made if the results exceeded chronic and acute Risk Action Levels (RALs) for community engagement. RDR calculations were not performed, even though the acute non-cancer RAL of 1 for community engagement was exceeded (Hazard Index, or HI, is 2). However, DEQ concurs that RDR calculations are not necessary because neither acute nor chronic HI values exceeded 3.

The next step in the CAO process is to complete and submit the AQ501 Cleaner Air Oregon Permit Application Form and the \$11,300 *Level 3 risk assessment – not de minimis* and \$1,000 *Community Engagement Meeting Fee – low activity fee*. The completed AQ501 Form and applicable fee are due no later than **October 8, 2021**.

Please contact Kenzie Billings directly at 503.229.5247, billings.kenzie@deq.state.or.us with any questions.

Sincerely,

J.R. Giska
DEQ CAO Program Engineer
