Re: Cleaner Air Oregon Risk Assessment Extension Request

Martha Cox,

DEQ received a written extension request from Columbia Steel Casting Co., Inc. (CSCC) dated February 8, 2023, for submittal of the Risk Assessment. CSCC indicated that all production activities at this facility have ceased as of January 24, 2023 and is now requesting an extension to submit a Risk Assessment by no later than July 31, 2023, in order to wind down operations and provide sufficient time to determine the future of the facility's air permit.

Based on the extenuating circumstances related to the facility closure that have eliminated all Toxic Air Contaminant (TAC) emissions and wind down activities related to making business decisions regarding the air quality permit, in accordance with OAR 340-245-0030(3), DEQ approves the extension request. Please submit your Risk Assessment by no later than July 31, 2023.

Please contact me directly at (971.337.4102, [JR.giska@deq.oregon.gov](mailto:JR.giska@deq.oregon.gov)), and we look forward to your continued assistance with this process.

Sincerely,

J.R. Giska  
DEQ CAO Program Engineer
