Powering Today. Protecting Tomorrow.

October 26, 2020

Dear Ms. Billings,

Covanta Marion was formally called into Cleaner Air Oregon (CAO) on August 13th to begin compiling our toxics emissions inventory for submittal by November 11th. Since receipt of this call-in letter, we have actively been preparing form AQ405CAO with our most recent available data, which will also include source test data from Covanta sister sites. In addition, per the request of the Oregon Department of Environmental Quality (DEQ), we also had additional metals analysis performed on our EPA Method 29 samples from our August source test.

Due to the delayed timing in receipt of these test reports, as well as the additional coordination needed with sister sites to obtain the most representative emissions data per OAR 340-245-0030(3), we are requesting a 45-day extension to complete a verification and review of this additional data. We also welcome a discussion at your convenience to demonstrate progress in completing form AQ405CAO.

Should you have any questions or need additional information please contact me or Scott Anderson at 503-393-0890.

Sincerely,

A handwritten signature in blue ink, appearing to read "Andrew Willis".

Andrew Willis
