Kim Medford,

DEQ received the Level 3 Cleaner Air Oregon (CAO) Risk Assessment for the ENTEK International LLC (Entek) facility located in Lebanon, OR on December 14, 2022. Upon review, DEQ met with Entek on January 10, 2023 to discuss minor revisions to the Risk Assessment that were required to confirm the results. Entek submitted a revised Risk Assessment on January 18, 2023, and DEQ was able to confirm the results of the original submittal.

DEQ approves the Level 3 Risk Assessment for this facility. The resulting Noncancer Acute Risk of a Hazard Index of 2 exceeds the Community Engagement Risk Action Level (RAL) for existing sources; additionally, the Residential Excess Cancer Risk exceeds the Source Permit Level. [[OAR 340-245-8010 Table 1](#)] This means that formal Community Engagement is required under the CAO program and that Source Risk Limits are required in the permit to limit risk from Toxic Air Contaminant emissions from this facility. DEQ has determined that a public meeting will be convened to satisfy the Community Engagement requirements under [OAR 340-245-0120](#), based on the level of interest expressed to DEQ by community members.

The next step in this process is to submit a completed [AQ501 CAO Permit Application Form](#), along with the required fees for the “Level 3 Risk Assessment – not de minimis” for a Title V source of **\$19,900** and the “Community Engagement Meeting Fee – high” of **\$8,000**. [[OAR 340-216-8030 Table 3](#)] This form and fees must be submitted by no later than **March 6, 2023**.

DEQ will be in contact regarding the formal Community Engagement public meeting to work through the details and timeline in the coming weeks. If you have any questions, please contact me directly at 971.337.4102, or JR.giska@deq.oregon.gov. I look forward to your continued assistance with this process.

Sincerely,

J.R. Giska
CAO Program Engineer, DEQ
