Jacob Rankin,

The Oregon Department of Environmental Quality (DEQ) has reviewed the source test plan submitted by Bison Engineering on behalf of Eagle Foundry on February 16, 2023, for evaluating if the cutoff and grinding enclosures meet the criteria to be considered Permanent Total Enclosures (PTE). Based on our review, the source test plan is approved.

Any modifications and/or alternatives to testing methods or procedures that are implemented to satisfy DEQ testing requirements must receive approval from DEQ prior to their use in the field. Changes not acknowledged by the DEQ could be the basis for invalidating an entire test run and potentially the entire testing program.

These testing results will provide valuable information regarding emissions from the facility. Please let me know if there are any changes to the schedule as I plan to observe the testing. If you have any questions or concerns, please contact me directly at 503-869-0054 or thomas.rhodes@deq.oregon.gov.

Sincerely,

Thomas Rhodes

Thomas Rhodes
DEQ CAO Source Test Coordinator
