Re: Address change for shredding activity:

Mr. Graiver,

I am writing this formal letter at your request to address my email communication on August 24th, 2020.

NW Metals Inc has relocated its State of the art, EPA certified and environmentally friendly Arjes Titan 950 Tier 4 shredder from its current location at 7600 NE Killingsworth st. Portland 97218 to 9537 N Columbia Blvd Portland 97203.

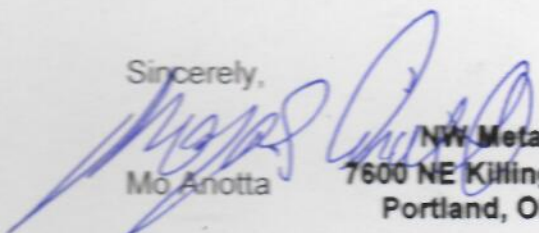

It is our understanding that DEQ has determined that shredding activity around our new location that we have relocated to do not pose any threat to public health.

Considering that there are two other metal shredding facilities, approximately at 50m and 400m respectively operating while their ACDP is being processed, and the amount of time that has passed since we submitted a complete application with full payment, we request that the agency allow us to operate our shredder to set up and to conduct air monitoring to obtain more representative site-specific emission data to comply with the requirement of the CAO while our application is being processed.

Feel free to contact me if you have any further questions.

Sincerely,

Mo Anotta

NW Metals Inc
