Oil Re-Refining Company DbA Industrial Oil- Klamath Falls facility
4150 N Suttle Road
Portland, OR 97217

Dear Mr. Briggs,

This letter provides written notice to you in accordance with OAR 340-245-0050 that Oil Re-Refining Company DbA Industrial Oil in Klamath Falls, DEQ Air Quality Source Number 18-0020, has been called in to the Cleaner Air Oregon program.

Governor Kate Brown created the Cleaner Air Oregon program in 2016. The goal of CAO is to better understand emissions of toxic air contaminants and evaluate potential health risks to people near commercial and industrial facilities that emit regulated toxic air contaminants, communicate those results to affected communities, and if needed, reduce those risks to below health-based standards.

Your facility identified above must perform a risk assessment in accordance with the rules adopted by the Environmental Quality Commission. This assessment will require you to provide information about current and potential emissions (e.g., production activities, emissions units, and control devices). This information will be used in conjunction with other data about where your facility is located to estimate risks to the surrounding community as required under Oregon Administrative Rules (OAR) 340-245-0050(1)(a),

(a) When notified in writing by DEQ, at DEQ's discretion, the owner or operator of an existing source with an operating permit must either demonstrate that it is an exempt source or:

(A) Assess risk from the source using any of the Level 1 through Level 4 Risk Assessment procedures in sections (8) through (11);

(B) Assess risk from the source using the emissions inventory submitted under OAR 340-245-0040(1); and

(C) Follow the applicable calculation procedures under OAR 340-245-0200.

Next Steps

1. Submit the CAO Pre-Application Fee form (AQ100CAO) with payment of the Call-In Fee by September 25, 2019, as identified in OAR 340-245-0400(3). The CAO Call-In fee associated with your Simple Air Contaminant Discharge Permit is \$1,000.
2. Submit the CAO Emissions Inventory form (AQ405CAO) by November 25, 2019 OAR 340-245-0030(1)(a). For most facilities, this emissions inventory will be more detailed than the toxic air

18-0020 Oil Re-Refining Company

contaminant emissions inventory submitted in 2017 because it will include information about maximum daily emissions as well as annual average emissions. If you wish to complete additional testing, this may affect submittal deadlines.

DEQ will need to be able to verify the information submitted in your Emissions Inventory. In order for DEQ to be able to approve your submission, please be sure to provide all supporting documents, including emissions factors and calculation methods. DEQ will consider submissions incomplete if submitted without supporting information.

Information about CAO permitting, including the forms mentioned above and a flow chart showing the risk assessment process can be found on the "Cleaner Air Oregon Risk Assessment Process and Forms" tab at <https://www.oregon.gov/deq/aq/aqPermits/Pages/CAO-reg.aspx>.

DEQ is available for consultation prior to reviewing and approving information submittals for the CAO permitting process, including the Emissions Inventory, Modeling Protocol, Risk Assessment Work Plan (if you plan to complete a Level 3 or Level 4 risk assessment) and the Risk Assessment itself. Once the risk assessment is complete and approved, the Risk Action Levels in OAR 340-245-8010 determine whether additional action is required.

Your contact for CAO risk assessment work is:

Kenzie Billings, CAO Project Manager
(503) 229-5247
billings.kenzie@deq.state.or.us

Please contact DEQ to clarify any questions you may have regarding the emissions inventory and risk assessment process. We look forward to working with you.

Sincerely,

Keith Johnson
Cleaner Air Oregon Program Manager
