RE: ORRCO-IOI Klamath Falls Deadline Extension Requests

Dear Kenzie,

Thank you for your time and assistance with ORRCO-IOI's emission inventory project. We are submitting this formal request for 45-day extensions of the May 1st revised emission inventory submittal and the June 15<sup>th</sup> source test deadlines, as provided in your March 17<sup>th</sup> letter. As we've discussed, while progress has been made on many of the requests in the letter, there is still work needed in obtaining more accurate emissions information for the combustion of fuel oil at the Klamath Falls facility as well as developing new storage tank emission factors. And right now, there is a significant delay in getting information from "third parties" due to the COVID-19 situation. Any relief you could provide would be greatly appreciated.

Thank you again for your time and help!

Best regards,

*M.E. Piper*
