Re: PCC Structurals Extension Request

Dear Ms. Billings:

Thank you for talking with Tom Wood and myself yesterday in follow-up to the PCC Structurals extension request submitted to you in accordance with OAR 340-245-0030(3) on April 10, 2020. This letter is to memorialize our conversation about the work we are doing to complete the information request submittal. Specifically, we spoke about the detail that will be shown in the requested process flow diagrams (PFDs), which you asked that we assign as a high priority in the information request submittal. Because of the two week shutdown at PCC, we understand that Sherry Uchytil is not currently available to send you a letter formally following up to her April 10 extension request. However, we believe that she should be back at work starting sometime next week at which point she will formally confirm the level of detail you should expect in the PFDs. Maul Foster & Alongi is still working towards the June 15 deadline for the first round of information request submittals, as specified in the April 10 letter.

Sincerely,

Maul Foster & Alongi, Inc.

Brian Eagle
Senior Environmental Scientist
