Brandon Hadzinsky,

The Oregon Department of Environmental Quality (DEQ) has reviewed the source test plan submitted by PCC Structural on April 27, 2023, for providing site specific emissions data from source testing for baghouses 8901, 9256, and 9203. Based on our review, the source test plan is approved with the following comments.

### ***Specific Comments***

1. For determining removal efficiencies, inlet and outlet test runs must be completed simultaneously.
2. Two valid test runs must be completed for DEQ to accept the test results from a source.
3. The source test report must be submitted within sixty (60) days of the completion of testing.

Any modifications and/or alternatives to testing methods or procedures must receive approval from DEQ prior to their use in the field. Changes not acknowledged by the DEQ could be the basis for invalidating an entire test run and potentially the entire testing program.

These testing results will provide valuable information regarding emissions from the facility. Please let me know if there are any changes to the schedule as I plan to observe the testing. If you have any questions or concerns, please contact me directly at 503-869-0054 or [thomas.rhodes@deq.oregon.gov](mailto:thomas.rhodes@deq.oregon.gov).

Sincerely,

*Thomas Rhodes*

Thomas Rhodes  
DEQ CAO Source Test Coordinator
