Re: Request for Extension

Dear Julia:

By letter dated August 26, 2022, the Oregon Department of Environmental Quality (DEQ) requested that Cascade Steel Rolling Mills, Inc. (Cascade) respond to questions concerning its air toxics emissions inventory. We are actively working on evaluating your request and the time that it will take to prepare our responses. Based on our preliminary review of what has been requested, we will not be able to submit all of the responsive materials by October 10, 2022. Because of the extensive and detailed nature of the questions and our need to spend considerable time in order to determine a realistic time frame for submittal, we are asking that you approve an approach where on or before October 10 we submit to you a proposed schedule for submitting responses to each of the questions. This will allow us to provide you with a much more accurate schedule that reflects our detailed thoughts.

Please let me know if his approach is satisfactory. I can be reached at (503) 437-0041 or by email at dlee@schm.com

Sincerely,

A handwritten signature in black ink that reads "Daniel Lee".

Daniel Lee

SSI Environment Engineering Director
