Re: Extension Request for Submittal of Cleaner Air Oregon Emission Inventory – Eagle Foundry

Jack Scott,

On April 15, 2022, DEQ received a request from Eagle Foundry for a 45-day extension of the deadline for submittal of the Cleaner Air Oregon (CAO) Emission Inventory (Inventory). The Inventory is currently due on May 2, 2022 and the requested submittal date is June 16, 2022. Eagle Foundry is requesting additional time to assess and incorporate the reporting thresholds for Exempt Toxics Emissions Units (TEUs) as applicable, which were provided to Eagle Foundry by DEQ on March 31, 2022.

The updated CAO rules for Exempt TEUs were adopted by the Oregon Environmental Quality Commission on November 17, 2021, and became effective on that date. Eagle Foundry was called-in to the CAO program on February 1, 2022, and has been required to comply with these rules since that time. However, DEQ understands that additional analysis may be required to apply the reporting thresholds in order to determine the reporting requirements for Exempt TEUs at Eagle Foundry. Further, DEQ recognizes that Eagle Foundry has demonstrated progress towards completing the Inventory by retaining the services of Maul Foster & Alongi for technical support during the CAO process, as well as meeting with DEQ to discuss aspects of the CAO process and DEQ's expectations regarding potential challenges with completing the Inventory.

For these reasons, DEQ approves a 14-day extension from the original submittal deadline of May 2, 2022, for the Inventory to be submitted by no later than **May 16, 2022**. This deadline is 46 days from the issuance of the Exempt TEU reporting thresholds, and is consistent with the 45-day deadline that DEQ has provided to sources in the CAO program with an approved Inventory in order to make applicable revisions related to Exempt TEUs.

Please contact me directly at 503.866.9643, julia.degagne@deq.oregon.gov, if you have any questions regarding this extension or the Inventory submittal requirements.

Sincerely,

Julia DeGagné
Air Toxics Project Manager
