RE: ORRCO-IOI Klamath Falls Additional Deadline Extension Request

Dear Kenzie,

Thank you for reaching out regarding the analytical laboratory's turnaround time issues. I greatly appreciate the heads-up. As you know, the source test was conducted on schedule; however, the unanticipated delay with the analytical laboratory compels us to ask for an extension of the standard source test report due date. To help ensure we do not have to come back for another request, could you grant us an additional 60 days for a total of 120 days from completion of the source test? Or could we go 45 days from the receipt of the analytical results?

Please let me know your thoughts and if you need any additional information to support our request for this report deadline extension.

Thank you again for your time and help!

Best regards,

*M.E. Piper*
