Re: Response to Cleaner Air Oregon Baghouse Testing Extension Request

Ms. Uchytel,

On October 19, 2021, DEQ requested that PCC Structurals perform representative source testing of baghouses by January 31, 2022. PCC Structurals submitted a baghouse testing conceptual plan to DEQ on December 3, 2021 that is still under review by DEQ. On January 14, 2022, PCC Structurals requested an extension to complete source testing according to the following schedule:

1. After DEQ confirms the number of baghouses that will be tested, PCC will solicit bids from potential testing firms and schedule dates on which the selected testing firm will complete the testing.
2. PCC will notify DEQ of the confirmed testing schedule within 21 calendar days of the date on which DEQ approves the baghouse testing conceptual plan.

DEQ approves this extension request due to the progress made and collaboration with DEQ to prepare for upcoming source testing to satisfy Cleaner Air Oregon requirements.

PCC Structurals also made a general request to have the ability to amend this extension request due to source testing firm responsiveness and COVID-19 impacts. DEQ cannot grant an extension for additional items unless they are explicitly requested in accordance with OAR 340-245-0030(3).

Please contact me directly at 503.229.5247 or [billings.kenzie@deq.oregon.gov](mailto:billings.kenzie@deq.oregon.gov). We look forward to your continued assistance with this process.

Sincerely,

Kenzie Billings  
DEQ CAO Project Manager
