Hi Brandon, this is the correct information. If you can put it into a Word doc and email it to us that would be great.

**Subject:** Annual Utility Report

I'm not sure exactly how this report should look, but here is what we spend on the sales from our Clean Fuel Credits in 2021:

Expenditure of CFC sales  
revenue in 2021:

License fees for EV Savings Calculator	2,500
EV Buyers' Guides	1,000
Level 2 charging station install rebates	8,000
Fleet charging--Florence	17,682
Membership in Forth, Plug in America, etc.	667
rEV Up! Sponsorship	500
Fleet charging--Reedsport	4,489

TOTAL for 2021: 34,838.

We receive such a tiny amount of incremental credits, we do not break down which is spent on incremental and which on base credits.

If this is not sufficient, please let me know.

Brandon Hignite  
Director of Shared Services
