

Oregon Clean Fuels Program
2025 Annual Report

Reporting for OAR 340-253-060 (11)

- (a) Credit Revenue: \$450,000
- (b) NA
- (c) Central Lincoln PUD offers \$250 rebate to any customer who installs an EV Charger at their location. Of that \$450,000, we reimbursed ourselves \$39,000 for EV Charger rebates to customers.
- (d) NA

Although Central Lincoln PUD's credit revenue far exceeded the customer rebate costs, this was done in anticipation of increased spending in 2026. Central Lincoln is currently constructing a new headquarters building and will use CFC funds to add several electric vehicle chargers to the property during construction. The credit revenue is consistent with the estimate to perform this work.
