Hi Rebecca,

Here is an update from Lane Electric:

- Lane Electric Cooperative is a member-owned rural electric distribution cooperative serving nearly 11,000 members. They began participating in CFP in 2017. In 2024, the cooperative used \$20,104 from clean fuel credit revenue to purchase the utility's first electric vehicle, a Ford Mustang Mach-E.

The unused revenue is being held in reserve for future projects and programs.

Please let me know if you have any questions. I'll be in touch shortly with our 2024 annual report, which is near completion.

April

Hi April,

I still haven't received an annual utility report from your organization so I wanted to check in about that.

Thank you,

Subject: Annual Utility Report

Hello,

Each year, the utilities that participate in the Clean Fuels Program are required to submit a report by **April 30th** outlining what they've done with the residential electricity credits they are awarded on behalf of their EV owning customers. We post these reports on our website here: <https://www.oregon.gov/deq/ghgp/cfp/Pages/utility.aspx>

I am reaching out today to remind you about this report and the deadline. If you did not sell and use any revenue from CFP credits, that's absolutely fine – your report can state that.

We also wanted to let you know that we will be issuing residential charging credits next week for the back half of 2024. You will be able to find those in your account likely next week.

For your convenience, I am including here the rules regarding your annual reporting requirements:

(11) Annual reporting of utility credit revenue. All electric utilities that receive base or incremental credits must annually report the following items to DEQ no later than April 30th. Failure to file such a report will result in the backstop aggregator or the incremental aggregator receiving credits for that utility until the utility files any past-due reports. Each utility must report the following information, for the prior calendar year:

(a) Total revenue from the sale of base and incremental credits attributable to residential vehicle charging, if applicable in the prior year;

(b) For entities whose revenue or expenditures exceed \$250,000 in a given year, the percentages that result when dividing the utility's CFP-related administrative costs, including but not limited to submitting reports, selling credits, and to administer any programs that were funded by CFP revenue from the utility's sale of incremental credits, including but not limited to project management and development and management of contracts to operate such programs by the amount of revenue reported under subsection (a);

(c) A description of the programs that were funded by CFP revenue the utility received from its

sale of base credits and the amount spent in each category in the prior year; and

(d) A description of the programs that were funded by CFP revenue from incremental credits, the amount spent in each category in the prior year, a description of the class of individuals or listing of organizations that benefited from the programs, and any other data elements that DEQ informs each utility receiving incremental credits that it will require following consultations with the Equity Advisory Committee created under OAR 340-253-0330(12)(j).

If you have any questions, please feel free to email us at OregonCleanFuels@deq.oregon.gov and we'll be happy to help
