This report covers domestic violence and sexual assault service providers funded by the Department of Human Services Domestic Violence Fund, the DHS Sexual Assault Victims Fund and the Oregon Domestic and Sexual Violence Services Fund through the Department of Justice, Crime Victims Assistance Section.

DHS CAF

During 2007, DHS awarded grants from the Domestic Violence Fund and the Sexual Assault Victims Fund to a total of 37 agencies throughout Oregon that provided crisis lines, crisis response, emergency shelter and related services to survivors of sexual assault and/or domestic violence and their children. In addition, there were five sub-grants to agencies for specific services, including culturally specific services.

DOJ CVAS

DOJ CVAS used the Oregon Domestic and Sexual Violence Services Fund to make grants to 46 programs providing services to survivors of domestic violence and sexual assault, including all programs funded through grants or sub-grants from DHS. ODSVS also funded legal services that are not included in this report. For more information, refer to the ODSVS Summary of Reported Outcomes for 7/1/2005 through 6/30/07 available from the Department of Justice CVAS available on their website: www.doj.state.or.us/crimev/odsaf.shtml.

All programs received funding from other sources, including the Victim of Crime Act (VOCA) Fund and the Violence Against Women Act (VAWA) funds administered by Oregon's CVAS; city and county revenue; local fund-raising; United Way; and/or foundation grants.

The following is a list of programs funded by DHS and DOJ CVAS. They are divided into seven regions. Those with shelter facilities have an asterisk. Please note: the programs listed in the TriCounty Region 2 area show the county where they are physically located. The TriCounty programs serve survivors from all three counties.

STATISTICAL SUMMARY

Background on Data Gathering Techniques

Each month programs submit statistical reports to DHS on the number of survivors sheltered, the number of calls, the number of survivors receiving non-shelter services and types of services. **They report total program statistics, regardless of the funding source.**

Both female and male survivors are served, but the majority of domestic violence and sexual assault survivors are women. Therefore the words “survivor” and “women” will be used.

Programs report on the number of survivors served and services provided to address “domestic violence”, “domestic violence and sexual assault” and “sexual assault.” For this report, “domestic violence” and “domestic violence and sexual assault” are combined.

Shelter Statistics

The form collects the number of:

- ◆ adult survivors sheltered,
- ◆ children under the age of 6 with those survivors,
- ◆ children 6 to 12 years old with those survivors,
- ◆ children 13 and older with those survivors
- ◆ adult shelter nights for each survivor, and
- ◆ total child shelter nights.

Shelter nights include nights in shelter facilities, safe homes and motels.

In addition to collecting demographic information on adults sheltered, the statistics form gathers if the survivor had a disability, if the survivor's primary language was not English, and if the survivors participated in safety planning.

Shelter survivors are counted once per stay in the month they leave shelter. At that time programs report on their total nights. For example, if a woman is in a shelter for ten nights at the end of October and stays five nights into November, she shows up in the November count with her full 15 nights. Survivors are counted for each shelter, safe home or motel stay. If a survivor is vouchered into a motel by one program then enters a shelter operated by another program, she will be counted by both programs.

The table below shows the number of child and adult survivors sheltered and the number of nights by region. Most of the survivors were sheltered due to domestic violence. Fifty-five adults were sheltered due to sexual assault.

<u>Region</u>	<u>Adults</u>	<u>Children under 6</u>	<u>Children 6 to 12</u>	<u>Children 13 and older</u>	<u>Adult Nights</u>	<u>Child Nights</u>

7	202	112	58	10	3929	3783
Total	2735	1296	881	337	51,022	48,794

Of those adults sheltered, 48.3 percent had children with them.

Programs offer a range of services during shelter stays including safety planning and assessments, information and referrals, peer support and advocacy. Just over 95.5 percent of all adult survivors leaving shelter were listed on the statistical form as having safety planning. That percentage increased to 97.7percent when looking just at those adults who stayed five nights or longer.

Length of Stay

Reading the rows across the table shows what percentage of adults in each region stayed 1 to 3 nights, 4 to 7 nights, 8 to 15 nights, 16 to 31 nights and over 31 nights, as well as the average adult nights for each region.

The average nights for the state increased from 2006. The number of adult survivors sheltered did decrease slightly, but the number of nights increased.

Unable to Shelter

There were 14,739 requests for shelter by adults that couldn't be met in 2007. This may include duplication if survivors called more than one shelter.

Demographic Information on Adults Sheltered

The following tables show information on adults sheltered in 2007.

1. Age

Reading across the row, the table shows the percentage of adults sheltered in each region by age category.

<u>Region</u>	<u>Under 21</u>	<u>21 to 30</u>	<u>31 to 45</u>	<u>46 to 55</u>	<u>56 to 65</u>	<u>over 65</u>	<u>Unknown</u>

Total	6.6%	1.4%	11.4%	1.2%	9.6%	0.2%	3.5%	64.5%	1.8%

Approximately 7.5 percent of the adults sheltered were listed as having a primary language other than English.

3. Who the Abuser Was

The table shows the percentage of adults sheltered within each region by the relationship of their abuser.

4. Disability

About 14.8 percent of adults sheltered were reported as having a disability, including physical, mental or emotional disabilities.

5. Co-Case Management

Programs also provided services to survivors in other shelters. Examples include culturally specific programs working with women in mainstream domestic violence shelters, domestic violence advocates working with survivors in other types of shelters, and advocates working cross county lines when a survivor is sheltered by another program for safety but still needs advocacy in her home county. Over 700 survivors received that service. That number may include some duplication as it is reported for each month. A survivor may be in shelter for more than one month so would be counted each month.

Non-Shelter Survivors Served

Data is collected on the unduplicated number of survivors not in shelter who receive services in person each month. Non-shelter survivors are counted once per month, no matter how many times they receive services. For example, a woman who receives assistance with a restraining order and attends support group three times during the month is only counted once that month under “non-shelter survivors served.” However, a survivor is counted in every month she receives a service. Therefore, if she attends support group for six months, she will be counted in each month. In 2007, an average of just over 3100 non-shelter adults received in-person services each month.

Below is a breakdown by region for calls and non-shelter survivors served. **Calls** include crisis calls, peer support calls and information and referral. They do not include business calls. **Non-shelter adults, teens and children** show the unduplicated count of survivors, not residing in emergency shelter, who receive in-person services. Adults include both female and male survivors. The counts are divided between those survivors who received services primarily due to domestic violence and those who primarily received services due to sexual assault.

Teens are defined as age 12 to 20 years old, and children as under age 12.

Total	126,053	8685	75,607	35,266	2069	2936	583	5420

Units of services are counted for all survivors, including both shelter and non-shelter survivors. Services are counted each time they are provided. For example, a shelter resident may receive almost daily information and referrals, leading to the count for her services as being 30. However, due to the challenges of gathering data, service reporting is not consistent and under-reported.

The service definitions used are those used for VOCA funds. Services counted include:

- ◆ crisis response/counseling,
- ◆ support groups,
- ◆ information and referral,
- ◆ follow-up services,
- ◆ accompaniment to hospital or medical facilities,
- ◆ transportation, and
- ◆ legal and/or court advocacy.

Services to children may be provided directly to the child or to the parent on behalf of the child.
