SEPTEMBER 2019

Both SNAP and TANF have stopped falling, indicating that perhaps the ability of the economy to generate jobs for those with limited skills or spotty employment history has been reduced. TANF has reached pre-recession lows, but SNAP is much higher than it was in 2008.

NOTE: In order to deal with an overlap in monthly data reporting between TANF and the after-TANF benefit known as Employment Payments, TANF caseload counts have been revised, starting in May 2016. In any month where an Employment Payment has been authorized, the TANF case has been removed from the caseload count. This eliminates the possibility of duplicate counts.
