

SB832 was passed on July 15, 2019. The amendments to the law require posting specific information to the Department website once a CIRT is assigned. This information is contained in the table below and updated in real time.

Prior to July 15, 2019, some child fatalities were pending CPS assessment dispositional finding to determine if CIRT criteria was met. In those circumstances, if the assignment of the CIRT occurred after July 15, 2019, the new final report timeline and content requirements were applied and the cases included on the table. Those cases are marked with an asterisk (*).

A unique CIRT ID for each case is generated through the Department's database. This ID will be used instead of the deceased child's initials to resolves issues related to duplicative initials and further protect the anonymity of the family.

Final reports will be posted on this webpage no later than ten days after the due date listed unless there is a pending criminal investigation. In those cases, posting of the final reports to the CIRT webpage may be delayed if after the CIRT consults with law enforcement partners, the Department director determines the public interest does not outweigh the potential consequences to the law enforcement investigation.

NOTE: In some cases the date of the critical incident (the incident that led to the fatality) is not the same date as the fatality.

| Confidential CIRT ID: | Age of child: | Date of Critical Incident: | Was the child in the custody of the department at the time of the critical incident? | Was the child in the custody of the department at the time of the fatality? | Was there an open abuse investigation regarding the child at the time of the critical incident? | Was there an open abuse investigation regarding the child at the time of the fatality? | Date the Department assigned the CIRT: | Due date for the final report: | Will the final report be delayed? | Status of delayed final report: | Expected publication date of delayed final report: |
