What is an emergency or natural disaster?

Emergency and Natural Disasters include Earthquakes, Flooding, Wildfires, Landslides, Thunderstorms, Winter Storms, Hurricanes, Tsunamis, Tornados and human caused events (such as terrorism or a pandemic) that negatively impact a community.

What should my certifier know in case of an emergency or natural disaster?

Resource parents should provide their certifier with contact information of an emergency contact at time of initial certification and each renewal. Be specific and include telephone numbers (land lines and cell phone numbers), names and addresses. If the emergency contact changes, the resource parent should provide updated contact information within 24 hours of the change.

Who do I need to contact in the event of an emergency or natural disaster?

In the event of a disaster, resource parents may contact Oregon 211 by:

- CALL 211 or 1-866-698-6155
- TEXT keyword "foster" to 898211 (TXT211)
- EMAIL foster@211info.org
- HOURS 24/7

The local Child Welfare office needs to locate all children under state care and supervision.

Be prepared to provide the following information:

- Foster child/young adult’s name;
- County or office of case management;
- Foster child’s whereabouts and situation; and
- The telephone numbers and address where the child/family can be reached.

What if I need to evacuate with the foster child/young adult?

Resource parents should evacuate to shelters that have been established by the county emergency manager in your area or to a location safely out of the disaster. After a family and the foster children/young adults have reached their destination, the resource parent is to call Oregon 211 by dialing within 24 hours.

When evacuating, please take the following:

- Each child/young adult’s medical card;
- Each child/young adult’s prescribed medications and related supplies; and
- Contact information for child/young adult’s physician and/or other medical providers

If normal communication is inaccessible, the Red Cross can provide communication assistance to resource parents upon request. Red Cross shelters that are opened during disasters can be located through the following web link:

WHAT CAN I DO TO PREPARE AT HOME NOW?

There are several web based sources, below, to assist in disaster preparedness, tailored to specific disaster preparedness. Some basic items to have prepared in case of sheltering at home should include for a minimum of two week supply:

ADEQUATE WATER

This includes at least one gallon of safe water for each individual per day. More may be required if there are unique needs for sanitation, medical equipment, etc.

ADEQUATE FOOD

If any of the food is canned, a can opener is available, there is a plan to cook and prepare foods (including modified textures) assuming utilities are not available, and that food should be evaluated to determine if it is spoiled, molded, or otherwise damaged or contaminated.

MEDICAL SUPPLIES

Each individual has at least a two week supply of essential medications, medical supplies and equipment.
