Update on COVID-19 vaccine clinics planned for long-term care facilities

Salem, OR — The first long-term care facility residents and staff will begin to receive COVID-19 vaccinations in Oregon tomorrow, Monday, Dec. 21, 2020.

To protect facility residents from the risk of infection, Oregon Department of Human Services (ODHS), Oregon Health Authority (OHA) and partnering facilities and pharmacies will provide all media with video footage and photographs of the roll out.

A press release with more information will be sent on Monday. This release, which is expected to be issued midday, will include updated information on the availability of photos and video along with contact information for the participating partners who are supplying the content.
