## **Public notice and comment on Transition Plans for Community-Based settings in Support Services, Comprehensive and Children's Model waivers**

---

The Department of Human Services and the Oregon Health Authority are seeking public comment on the initial determination that services authorized in four of the State's Medicaid 1915(c) waivers for individuals with Developmental/Intellectual Disabilities are community-based and have the qualities described at 42 CFR § 441.301(c)(4) for community-based settings. The services provided in the four waivers- Support Services, Comprehensive Services, Medically Fragile Children, and ICF/ID Behavioral Model are all non-residential services. The waivers can be viewed online

- [Home and Community-Based Settings Summary Oregon's Proposed Model Waivers](#)
- [Home and Community-Based Settings Summary Oregon's Proposed Support Services Waiver](#)

The Centers for Medicare and Medicaid Services (CMS) will issue guidance to States for non-residential settings. Until then, States must make a determination that services provided in non-residential settings are not institutional and not provided in institutional settings. The assessment of these services has been provided for public comment and input. Oregon is requesting input and comments on the determination that the services are provided in non-residential settings and are not institutional services.

**Comments can be sent to [odds.info@state.or.us](mailto:odds.info@state.or.us) and should be received no later than June 9, 2014.** The Oregon Health Authority and the Department of Human Services will submit the renewal applications and request for amendment on June 15, 2014.
