### **CBC-22-031-Provider Alert**

**June 15, 2022**

**TO: Residential Care and  
Assisted Living Facilities**

**FROM: Safety Oversight and Quality**

**RE: Infection Control Specialist Training deadline, July 1, 2022**

On June 10, 2022, Provider Alert CBC-22-030 was issued stating the deadline for the Infection Control Specialist Training would be extended to September 1, 2022.

Rule 411-054-0050 states facilities must establish infection prevention and control protocols and have an Infection Control Specialist trained by **July 1, 2022**. The training deadline currently in rule will still be in place. This means the deadline for facilities to complete Infection Control Specialist Training is still **July 1, 2022**.

The intent of the previous Provider Alert was to allow facilities time for their Infection Control Specialists to take the Department approved training due to the delay in the release of the training.

Because of this delay, when the Department reviews facilities for compliance with the training deadline, the Department will give technical assistance until September 1, 2022. When reviewed by the Department the facility needs to demonstrate they are making ongoing progress in the completion of the training.
