

STAY HOME. SAVE LIVES.

What is the Battelle System?

- The Battelle Critical Care Decontamination System is a resource used to decontaminate N-95 respirators.
- This system will arrive next week in Eugene and will be available for use free of charge for any public or private organizations with personnel who use N-95 respirators.
- Eugene will be the hub for the Battelle System and will serve the needs within a 200-mile service area.
- For remote sites outside the 200-mile area, Battelle will provide FedEx labels for shipment to the closest decontamination site.
- An additional Battelle System is expected to arrive in Idaho Falls, Idaho, to help serve locations in eastern Oregon.

Who is this service for?

Any healthcare workers and first responder agencies, law enforcement agencies, correctional facilities, and fire and EMS agencies with N-95 respirators that have been directly (or indirectly) exposed to:

- Patients or infectious materials (e.g. blood, tissue and specific body fluids).
- Contaminated medical supplies, devices, and equipment.
- Contaminated environmental surfaces or contaminated air.

System to decontaminate N-95 respirators will be available to agencies next week.

The State of Oregon is working with the Defense Logistics Agency (DLA) on behalf of the U.S Department of Health and Human Services (HHS) along with the Federal Emergency Management Agency to obtain resources to decontaminate N-95 respirators. The federal government is using the **Battelle Critical Care Decontamination System** to meet this mission and are bringing a system to Oregon.

How can your agency access the Battelle System?

Please go to www.battelle.org/decon and click on the enroll button and complete the necessary information.
