The type of conditions attached to an AFH-DD license must directly relate to a risk of harm or potential risk of harm to individuals. The Department may attach a condition to a certificate upon a finding that:

- (a) Information on the application or initial inspection requires a condition to protect the health, safety, or welfare of individuals;
- (b) A threat to the health, safety, or welfare of an individual exists;
- (c) There is reliable evidence of abuse of an individual; or
- (d) The AFH-DD is not being operated in compliance with these rules.

- (a) Restricting the total number of individuals in the AFH-DD based upon the ability of the licensee to meet the health and safety needs of the individuals;

(5) Conditions imposed remain in effect until the Department has sufficient cause to believe the situation that warranted the condition has been remedied. If the licensee believes the situation that warranted the condition has been remedied, the licensee may request, in writing, that the condition be removed.
