(a) Be developed using a person-centered planning process consistent with OAR 411-004-0030(1) and in a manner that addresses issues of independence, integration, and provides opportunities to seek employment and work in competitive integrated employment settings, in order to assist with establishing outcomes, planning for supports, and reviewing and redesigning support strategies.

(b) Be designed to enhance an individual's quality of life.

(c) Be consistent with the following principles:

(A) Adult individuals have the right to make informed choices about the level of family member participation.

(B) The preferences of an individual, and when applicable a child's legal representative or family, must serve to guide the ISP team. The case manager must facilitate active participation of the individual throughout the planning process.

(C) The planning process is designed to identify the types of services and supports necessary to achieve an individual's preferences, and when applicable a child's legal representative or family, identify the barriers to providing those preferred services, and develop strategies for reducing the barriers.

(D) Specify cost-effective arrangements for obtaining the required supports and applying public, private, formal, and alternative resources available to an eligible individual.

recognize that an individual may choose to pursue working full-time, part-time, or another goal identified by the individual.
