

ODDS received feedback from stakeholders reviewing the proposed updates to The Guide to Home Modifications regarding asbestos testing. ODDS appreciates those who took the time and opportunity to review this proposal. We value your input in making our program better.

A commenter suggested that adding more rules or barriers to achieving a home modification was a barrier.

ODDS Response: The change in the policy removes a barrier. Prior to this change, the homeowner would have to ensure that there was no asbestos present in any area that might be disturbed during the building of the home modification. This change removes that requirement.
