| <input type="checkbox"/> Child Welfare Programs                |   |

**Action required:**

**Emergency Plans for ODDS 24-Hour Residential Providers**

Oregon Administrative Rule 411-325-0230(3) requires that 24-hour residential provider agencies have a written emergency plan. OAR 411-323-0060(1) also requires that all provider agencies have policies and procedures in place to maintain and protect the health of individuals.

ODDS requires that all 24-hour residential provider agencies immediately review their written emergency plans, as well as their policies and procedures for maintaining health and safety, in order to ensure they sufficiently address strategies to mitigate and respond to an outbreak or pandemic of infectious disease including COVID-19. Providers must submit plans, policies, and procedures, to ODDS as soon as possible, but **no later than Wednesday, March 25, 2020**. Email plans, policies, and procedures to ODDS at: [ODDS.Questions@dhsosha.state.or.us](mailto:ODDS.Questions@dhsosha.state.or.us).

The emergency plan must include all requirements outlined under [OAR 411-325-0230\(3\)](#), including:

- A written emergency plan that takes into consideration the needs of the individuals and addresses events such as a pandemic (e.g. immediate and continued access to medical treatment, continued access to medical supplies and equipment, behavior support needs anticipated in an emergency).
- A plan for relocation (including transporting and tracking individuals, notification to ODDS and the case management entity, etc.).
- A plan for ensuring adequate staffing to meet the life-sustaining and safety needs of individuals.
- A plan that addresses the needs of individuals (e.g. immediate and continued access to medical treatment, continued access to medical supplies and equipment, behavior support needs anticipated in an emergency, etc.).
- A system for preventing infectious disease; a system for identifying, reporting, monitoring, and treating symptoms of infectious disease; a system for responding to isolation and quarantine (at the direction of a public health entity).
- Documentation that staff are trained on standard precautions, infection control, and handwashing.
- Policies that ensure both individuals and staff remain home when they are sick.
- Verification that emergency contact information is current for each individual using services.
- Plan for maintaining sufficient medical, sanitation, and food supplies.
- Coordination with the employment or day program provider.

The plan should also include the expectations outlined in [Policy Transmittal 20-015<sup>1</sup>](#), as well as the following:

- ODDS is asking that providers document agreement that they will not accept new referrals to a home where a person or care giver has a suspected or confirmed case of COVID 19. This agreement may be documented in the Provider Emergency Plan.
- Policies and expectations for visitors (e.g. handwashing, prohibiting visitors exhibiting symptoms of infectious disease, etc.).

---

<sup>1</sup> <http://www.dhs.state.or.us/policy/spd/transmit/pt/2020/pt20015.pdf>

- A plan for communicating with individuals and families.
- Strategies for coordinating with federal, state, and local health officials, and following direction by a federal, state, or local public health official, including procedures for notifying individuals regarding suspected or confirmed COVID 19.
- Procedures for notification to ODDS Emergency Management Specialist in the event of potential exposure, outbreak, or closure, due to COVID 19 or other infectious disease at: [ODDS.INFO@dhsosha.state.or.us](mailto:ODDS.INFO@dhsosha.state.or.us).

## Training for Direct Support Staff

Provider agencies have also been expected to document that employment professionals and direct support professionals are trained on the provider emergency plan and the health and safety policies and procedures. Generally, this information is requested during an ODDS licensing review; however, verification of this training may be requested sooner to ensure providers are prepared for responding to an outbreak of infectious disease. Training requirements apply regardless of the relationship of the direct support professional to the individual(s) they are working with.

## More Resources and Information:

Providers must continue to remain up to date on expectations and guidance from Federal, State, and Local health officials. Provider may also request technical assistance from ODDS regarding what should be included in their written emergency plans, as well as their policies and procedures for maintaining health and safety.
