Executive update:

The team continues to collect information from stakeholders that will inform the development of strategies and assist in amending the timeline to complete the FNAT work. This week a lot of work has been completed around the ISP "Bridge" plan to incorporate the Career Development plan and get it ready for the 1/1/14 policy roll out.

ODDS program staff are continuing the development of a process map to show the flow for CDDP's, Brokerages and state responsibilities on how consumers will receive services from beginning to end; this was scheduled to be completed by late December, however the push on the ISP work along with completing and filing rules, incorporating feedback for the Expenditure guidelines and the holidays have pushed this out a couple of weeks. Union and Home Care Commission discussions continue to happen on POC and this timeline is in the process of being re-set as well, looking at a July 1, 2014 implementation date.

The amended Level of Care form has been reviewed internally and the field has also used and reviewed the form. The upcoming rule changes in 2014 will require another amendment to the form. The Steering team agreed it would be best to postpone releasing the amended form until the rule changes can be incorporated in an effort to mitigate confusion to the field with multiple form releases. The release date for the amended LOC form is now scheduled for late February.</p> <p>A transmittal regarding keeping LOC active is still in draft process. The plan is to have this go out along with process timelines. Anticipating this to go out in the next couple of weeks.</p>

A review by the Oversight Committee is being scheduled for the first part of January. It is noted that there is language regarding the 3 phases of the development towards the "One" ISP that are used interchangeably and causing some confusion among stakeholders and some program staff. The team is meeting Friday to land on language and define what is included in the "**Bridge" ISP, the "**Interim" ISP and the "One" ISP (*please note that this may not be the terminology used in all areas). We will share more on this in the next status report.</p>
