

Q: How can I easily find which clients have missing demographics?

A: Currently there are no reports that will detect missing demographics, however, the absence of a Client ID indicates the OAA Sumry tab In the client record has never been opened.

Client ID is assigned when end-user selects the OAA Sumry tab. Demographics housed in this tab are: Number in Household, Poverty Level, Ethnicity and Race.

Here is a screenshot demonstrating the absence of Client ID's for three client records.

		Service & Billing Report						Print Date: 05/21 /2014
Dist Name.... :	Morrow	Service:	ALL
