carter is a sister of Mrs. Kellogg and widow of the late Alex
carter, who died at this place several years ago.

Dennis [Jerry] McCoy, who was struck by an incoming train on
the station platform at Woodville about a month ago, and who died
there as a result of his injuries was buried here Tuesday in the
O.O.F. cemetery by the local lodge, of which he was a member.
He received serious internal injuries, from which dropsy, the
immediate cause of his death, developed. McCoy was about 65 years
of age. Before going to Woodville, where he conducted a cigar
to, he was engaged in the drug business here for several years.
He had a family in the east.

A crosscut run forty feet on the vein at the Grey Eagle mine
on Sardine Creek shows two feet of $7 ore, and the vein is widening
and improving as the work proceeds. The present development work
is considered to be of great permanent value to the mine.

Gravel is being hauled for the concrete work for the new
bridge across Rogue river, and work will start on the construction
of forms for the concrete Monday. Local workmen have been engaged
for this work and as far as possible local labor will be employed
on the entire job.

The largest deer reported killed in southern Oregon this
operations begin, however, the bed of the river will be thoroughly prospected.

With the intention of sinking 500 feet from the 125-foot level, gaining a total depth of 625 feet, a new company, organized last week in Portland, has leased the Grey Eagle mine on Sardine Creek from the Oregon-Gold Hill Mining company. The new company will be known as the Grey Eagle Mining company, of which Ward B. Stevens will be manager, with headquarters at the mine. J.R. Wolfe will continue as engineer. Foremen Manager VanHouten will remain in the Gold Hill district, which he believes is soon due to come to the front in a mining way. The Grey Eagle has a new and complete milling equipment. A two-machine air compressor is now being installed, which will operate the two drills that will be used in sinking. The mine will be developed by drifting from the 625-foot shaft, which may be sunk even deeper if it is deemed advisable.

To dredge Rogue river for the gold which it is believed has been deposited in its rocky bed for ages is the plan of J.W. Lane, late engaged in mining in California, and Medford associates. A lease has been secured from the Chavner estate to operate a dredge in the river in the pool below and the channel above the railroad bridge at Gold Hill, the land on both sides belonging to that estate. The dredging process, which is of Mr. Lane’s invention, will have its first trial here, and if it proves successful it means that miles of Rogue river’s bed will be worked for its yellow treasure. A boat will be built from which to operate the dredge, either electric or gasoline power to be used. Before actual
Gold Hill District Soon to Enter Era of Great Mining Activity

French Capital Buys Bill Nye

Trustbuster, Last Chance, Bill Nye and Others Begin Work Shortly

A controlling interest in the Bill Nye mine on Galls Creek has been purchased by a French syndicate represented by R. Boulier, who has just completed the transaction with F.C. Bellamy, representing the eastern capitalists, who owned the mine. Operations, which have been suspended owing to litigation among the people represented by Mr. Bellamy, will be resumed immediately.

The Bill Nye, which is equipped with a stamp mill and an electric power line, has been a good producer. It was formerly owned by H.B. Nye, and under his management much rich rock was taken out.

The five-stamp mill on the Weatherby property in Sams Valley, known as the Trustbuster, will soon be in operation.

The new two-stamp mill on O.C. Tiffany's Last Chance mine on Galls Creek will be running next week.

G.L. Haff has bonded his Blossom mine on Sardine Creek to San Francisco people.

Since the selling of their power interests, the Rays have announced that they will henceforth devote their energies to the development of their mining properties, which means that the Braden on Kanes Creek will soon be in operation, and probably several other mines owned by them in this district.

With the Sylvanite and Grey Eagle in operation, together with the other mines on which work will soon be resumed, the Gold Hill district will see more mining activity [than] it has for many years.
